Dr. Sreenivasan

Dr. Ronak D Nankani
Dr. Kanmani. R
Dr. S. Vijaya Suresh
Dr. S. Vandana

Dental technologies are constantly changing, upgrading, and improving. Traditionally, in primary teeth the root canal preparation was performed using hand instrumentation technique and then using existing adult rotary Niti file systems. Recently nickel-titanium (Ni-Ti) rotary files have been developed for use in pediatric endodontics. Pediatric Dentist has shifted the root canal preparation of primary teeth using exclusive paediatric rotary file. This shift has ended in development of many pediatric rotary file system.

The training objectives includes brief outline of the evolution of Pediatric endodontic instrumentation, Hand instrumentation Vs rotary instrumentation, design features of Niti Rotary file systems used in endodontics, Studies on different adult rotary file systems in primary teeth, drawbacks on use of adult rotary files in pediatric dentistry, Need for an exclusive pediatric rotary file. This course improves the skill of dentist to use The Gold Standard kedo rotary file systems in pediatric dentistry.

The hands on training will be conducted using Kedo pediatric rotary file system the world's first paediatric rotary file. The participants will be given a specially prepared resin block simulating the primary molar with an elaborately designed pulp complex, in which they can locate the canal orifices which are placed in simulated locations in the resin block, negotiate the canals and use the kedo pediatric rotary files to prepare root canal space and obturate the canals.

Participants will be taught to place a stainless steel crown.

Dr. Ganesh Jeevanadan, BDS, MDS, PhD
Pedodontist

Professor in the Dept of Pediatric and Preventive Dentistry and also the Associate Dean of Innovation and Development in Saveetha Dental College & Hospitals, Chennai, TN.

He has been awarded the prestigious Young Pedodontist award by ISPPD during 2021 and International innovation award at London in the year 2018

He is the inventor of
World's First rotary file from primary teeth,
World's First Silver-Di-Amine Fluoride gel and
Flexible rubber dam clamps

CDE TEAM:

Dr. T. Mansoor Ali
Dr. Subashini Reuben
Dr. C. Burnice Nalina Kumari
Dr. Sreenivasan

Dr. Ronak D Nankani
Dr. Kanmani. R
Dr. S. Vandana

Today, direct posterior composite fillings are "bread & butter restorations" for the general dentist. However, the step-by-step procedure of the incremental build-up technique can be very time consuming in the dental practice. Particularly with children or elderly patients, as well as with larger restorations, this can be a significant challenge for the dental practitioner. In addition, the clinical procedures need to be carried out in the most efficient way in order to optimize the revenue – without sacrificing the quality of the final restorations. This lecture will introduce new techniques and materials to restore posterior cavities faster and more efficiently.

For anterior composite restorations to mimic natural tooth structure, the clinician must have a comprehensive understanding of the color, translucency and morphology of natural tooth structures as well as material science and restorative techniques involved. In this lecture participants will learn how to create highly aesthetic anterior restorations with anatomical layering techniques involving different colours and translucencies to achieve a true-to-nature result that is invisible to the human eye.

Our Faculty

Dr. Michael Dieter
Head of Direct Restorative & Prevention Global Education

Dr. Sachindeep Singh
KOL - Ivoclar India

Making People Smile

ivoclar

Master all your direct anterior & posterior composite restorations with excellence!

Chennai, Monday, 6 May 2024

10:00 - 11:15	Dr. Michael Dieter : Lecture 1 "Clinical solutions to optimize posterior composite restorations – (almost) at the speed of light" This lecture will introduce new techniques and materials to restore posterior cavities faster and more efficiently with a focus on: - Fast and easy isolation techniques - Predictable bonding procedures - Application: layering vs. bulk filling techniques - Complete and fast polymerization - Prevention of post-operative sensitivity
11:15 - 11:45	Break
11:45 - 13:00	Dr. Michael Dieter : Lecture 2 "Make your patients smile with aesthetic direct anterior restorations" Subtopics of this science-based lecture will include: - Aesthetic tooth preparation techniques - Control of Value, Chroma, Translucency and Opalescence - Anatomical build-up techniques - Ideal finishing and polishing techniques
13:00 - 14:00	Lunch Break
14:00 - 15:30	Dr. Sachindeep Singh : Lecture 3 Clinical case discussions - Anterior composite restorations - Posterior composite restorations
15:30 - 15:45	Break
15:45 - 16:45	Dr. Michael Dieter : Demonstration for Anterior & posterior composite restorations Participants can "see & feel" the new Tetric N2 composite line
16:45 - 17:00	Q & A
